To whom it may concern:

This is to say to anyone considering the services of PAUL WAINWRIGHT—whose specialty is large-format black & white true photographic images using traditional techniques and equipment, following guidelines & criteria suggested by the Historic American Buildings Survey (HABS)—that he performed admirably in the recent grant-supported project undertaken by the Town of Jaffrey documenting the Jaffrey Meetinghouse during which he provided his services.

This project and the final products submitted by Paul Wainwright may be viewed on-line at :

The Jaffrey Meetinghouse Committee has no hesitation in recommending his services for any projects of a similar nature and was more than pleased with the results, his attention to detail, his ability to produce what was contracted for, and his success in meeting deadlines and doing so on budget.
